

**PATENT PENDING
NO: S2016/0023**

*Quality Grip Mats for
Quality Turntables*

The Wooden Bull provides superior grip on your vinyl records and by doing so greatly improves drive through the stylus. Gluing the leather to the cork ensures a much flatter surface than leather on its own. The flatness of the surface and the texture of the leather combine to create the grip effect.

Placing the middle finger of your left hand on the edge of the record and rolling the record forwards and backwards you will feel the whole platter move with the record with no slipping.

For best results secure to your turntable platter with a little double sided tape.

Surface:

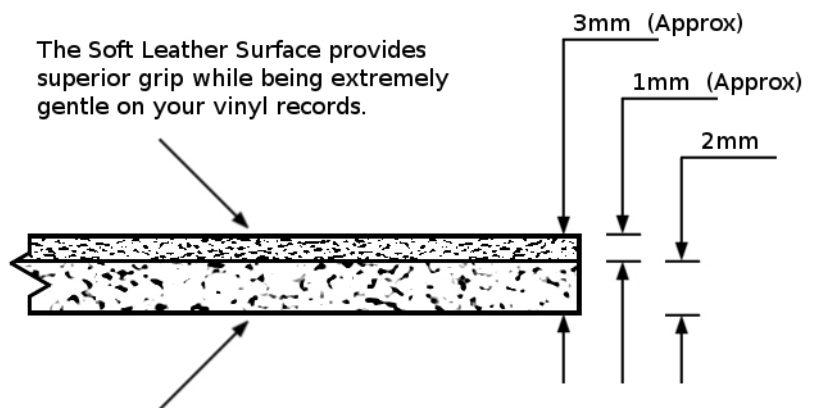

**Leather which is Cowhide
0.8mm to 1mm.**

Underlayer:

Gel Infused Cork 2mm.

**Diameter = 292mm
Spindle Hole = 7mm
Thickness = 3mm**

**Proudly Manufactured in
The Republic of Ireland.**

The Soft Leather Surface provides superior grip while being extremely gentle on your vinyl records.

The Gel Infused Cork Underlay provides excellent vibration damping while ensuring the leather surface is completely flat and free of underneath air pockets.

Wooden Bull is a registered company in the Republic of Ireland. The Wooden Bull logo is registered in the Republic of Ireland.

The entire product and related business entities are the sole ownership of John O'Regan Design.
